

When attending your appointment, we have taken a number of practical steps to ensure those attending and our staff safety:

1 When re-arranging your appointment or a few days before, a member of our team will check that neither yourself or anyone in your household are self-isolating or displaying COVID-19 symptoms.

Please DO NOT attend your appointment if you answer 'Yes' to possible symptoms.

Arriving by public transport—please follow government guidance

2

3 Face coverings must be worn in line with government guidance. Please bring your own if possible, if not the Screener can provide one for you.

Please wait outside the venue or in your vehicle. The Screener will call your mobile phone when they are ready to start your appointment and greet you at the door.

4

5 The Screener will be wearing personal protective equipment (PPE); an apron, gloves, mask and visor. The camera has been fitted with a Perspex screen.

All the equipment and room undergo rigorous cleaning between appointments and at the beginning and end of each day

6

7 Whilst the tropicamide drops dilate your pupils, you will not be asked to wait in the waiting room, you will stay within the clinic room with the Screener.

In a recent survey 99.5% said they felt safe attending screening
